

FINTECH 100

Leading Global
Fintech Innovators
Report 2015

Introduction

Dear Reader,

We are pleased to present the second annual 'Fintech 100', the best fintech innovators, this year from 19 countries around the world.

The Fintech 100 are those companies using technology to the best advantage and driving disruption within the financial services industry. These companies have a commitment to excellence, superior customer experience and a demonstrated ability to do one thing in a market better than everyone else.

The Fintech 100 includes the leading 50 fintech companies across the globe, and the most intriguing 50 'emerging stars' – exciting new fintechs with bold, disruptive and potentially game-changing ideas – expanding on the success of last year's list.

The Fintech 100 in 2015 includes:

- 40 companies from The Americas (40%),
- 20 companies from the EMEA (20%),
- 18 companies from the UK (18%),
- 12 Companies from Asia (12%), and
- 10 companies from Australia and New Zealand (10%).

Below is a map which looks at where the top fifty companies are placed worldwide. As you will see, within the top ten, two are from China. There is also a spread of companies working out of San Francisco, and some emerging areas such as London and Sydney are gaining more traction.

Through our report we have analysed a number of sectors within the financial industry, these sectors are; insurance, transactions, lending and wealth.

The Fintech 100 in 2015 includes:

- 25 payments and transactions companies (25%),
- 22 lending companies (22%),
- 14 wealth companies (14%), and
- 7 insurance companies (7%).

The data that was discovered through the report shows an interesting spread of Fintech is the combination of technology and financial services resulting in the disruption of the finance industry and this sector has seen substantial growth over recent years. Global fintech financing has risen seven-fold over the past three years to an estimated US\$20billion for 2015, a rise of 66% on the level of investment in 2014.

In an industry that will soon be irrevocably changed by the disruptive effect of innovation, the companies doing fintech best are those most likely to succeed. Already, some of the world's major financial centres are equally becoming known as centres for fintech innovation: London and New York, and more recently Sydney.

Fintech is clearly not to be ignored, and the next question one must ask: "who are the most innovating global fintech companies across the globe?"

We've selected the 'Fintech 100' following extensive global research and analysis based on data relating to five factors:

1. Total capital raised
2. Rate of capital raising
3. Geographic & sector diversity
4. Consumer & marketplace traction
5. X-factor: degree of product, service and business model innovation (a subjective measure that is applied only with respect to companies outside of the Top 50 on the list)

The above assessment criteria reflects the fact that venture capital invested is a relevant measure of innovation which in turn fuels enduring competitive advantage. Venture capitals seek this enduring competitive advantage over and above anything else.

The companies named in this report all take a well-deserved position as the 'leading 100'. Nonetheless, there are many other exciting and creative fintech companies around the world that are established and emerging. We hope that this report is just the start of the fintech future, and that the 'leading 100' innovators will soon become a register for all fintech companies.

The Top 10 companies in the Fintech 100 for 2015 are:

1. ZhongAn (China)
2. Oscar (USA)
3. Wealthfront (USA)
4. Qufenqi (China)
5. Funding Circle (UK)
6. Kreditech (Germany)
7. Avant (USA)
8. Atom Bank (UK)
9. Klarna (Sweden)
10. OurCrowd (Israel)

You can read all about these companies, and many others, in the following pages.

We encourage you to visit www.fintechinnovators.com to find out more.

Yours Faithfully,

Toby Heap

About the List

The Fintech 100 is a collaborative effort between H2 Ventures and KPMG and analyses the fintech space globally. The report highlights those companies globally that are taking advantage of technology and driving disruption within the financial services industry. A judging panel comprised of H2 Ventures, KPMG and Matchi, the online fintech match-making platform, was used to decide on the final composition of the Fintech 100 list.

The benefits of being included on the list go beyond profile. This year, 10 of the top emerging fintech startups will be invited to attend a Fintech Summit in London to pitch their ideas to some of the world's leading financial institutions, venture capital funds and investors. In addition they will receive professional services support from KPMG, plus membership and discounted deal-success rates with Matchi.

Symbols Explained

- How many staff work at the company
- How large is the business
- What level of social media and user engagement do they have?
- Is the company enabling existing financial services?
- Is the company disrupting financial services?
- Companies to watch in the coming years

Oscar #02

“Oscar was created when we opened one of our own insurance bills, only to realize we could not make any sense of it.” - Josh Kushner, Co-founder & CEO

Company Description

The Oscar team is focused on utilizing technology to simplify the entire healthcare experience. A team of technology and healthcare experts looked at the current state of the US healthcare system, and were frustrated by the horrible consumer experience. In response, they decided to reinvent how healthcare is delivered. They are reinventing how to manage care, process medical claims, control healthcare costs, and provide transparency. With all the complexity hidden behind an easy experience for members. Oscar is making the healthcare system simple, smart and friendly.

Wealthfront #03

“We’re not very concerned about the large companies being able to keep pace, They simply can’t innovate and deliver features fast enough. Instead, we’re focused on defining a better way to invest for this generation.” - Adam Nash, CEO

Company Description

Wealthfront is an automated investment service which combines world-class financial expertise and leading edge technology to provide sophisticated investment management at prices that are affordable for everyone. Wealthfront makes it easy for anyone to get access to world-class, long-term investment management without the high fees or steep account minimums. Their mission is to provide access to the same high quality financial advice offered by major financial institutions and private wealth managers, like tax-loss harvesting, without the high account minimums or costs.

Qufenqi #04

趣分期
Qufenqi.com

“Beijing-based Qufenqi.com, recently completed US\$ 9–digit Series E funding round and will soon announce investors and specific funding amounts. We also rolled out a new product, “Quzu,” which allows users to pay their apartment rent in installments” - Min Luo, CEO

Company Description

Qufenqi is an electronics retailer that offers monthly installment payment solutions to the students and professionals in China. The company primarily offers smart phones, laptops and other consumer electronics online, allowing customers to choose their own down payment option and the time period for making regular monthly installments. Customers have to close the installments within two years of the purchase. The business model is tailored for students and young white collar workers, with the final price and monthly required payments shown transparently on the product page.

Funding Circle #05

“Our vision is to help millions of businesses across the world sidestep the outdated and inefficient banking system and borrow from investors.” - Samir Desai, Co-Founder & CEO

Company Description

Funding Circle was created with one big idea; to revolutionise the outdated banking system and secure a better deal for everyone; with offices in the UK, US, Germany, Spain and the Netherlands. Funding Circle is the world’s leading marketplace exclusively focused on small businesses, providing a platform where investors can browse businesses that Funding Circle has credit assessed and approved for lending. Once approved, businesses post their loan request on the Funding Circle marketplace. It is here that investors choose which type of business to lend to, the amount of money they wish to lend, and the interest rate they want to earn.

Avant #07

AVANT

“Avant is serving unmet demand on a global scale and providing millions of consumers with access to responsible credit in a clear and timely manner. We are proud of Avant’s tremendous growth over the last three years and continue to believe in the power of technology to innovate and improve the customer experience.” - Al Goldstein, CEO

Company Description

Avant is a fast-growing marketplace lending platform that is lowering the costs and barriers of borrowing for consumers. Through the use of big data and machine-learning algorithms, the company offers a unique and highly customized approach to streamlined credit options. At its core, Avant is a tech company that is dedicated to creating innovative and practical financial products for all consumers.

Klarna #09

Klarna™

“We want to make it simple and safe to shop. We have done this for e-retailers for nearly ten years and now we are doing the same for individuals in the marketplace.”

- Sebastian Siemiatkowski, CEO

Company Description

Klarna is one of Europe’s leading providers of payment solutions for e-commerce. Klarna separates buying from paying by allowing buyers to pay for ordered goods after receiving them, providing them with a safe after delivery payment solution. At the same time, Klarna assumes all credit and fraud risk for e-stores so that sellers can rest assured that they will always receive their money. Klarna’s vision is to enable trust and to offer a frictionless buying experience to buyers and sellers across the world.

Robinhood #12

"In ten years, people might think it's crazy we used to pay to trade stocks when all it takes is a few taps." - TechCrunch

Company Description

Robinhood is a new way to invest in the stock market. They believe that everyone should have access to the financial markets and are on a mission to inspire a new generation of investors. Robinhood is a stock brokerage that allows customers to buy and sell US stocks and ETFs with zero commission. They cut out the fat that makes other brokerages costly — hundreds of storefront locations and manual account management.

Square #13

“What looked novel a few years ago, now is commonplace, in large part because of payments company Square.” - Australian Financial Review

Company Description

Square helps anyone take care of their business. Their service supports your entire business, from a register in your pocket to reports on your laptop. Square’s register service is a full point of sale with tools for every part of running a business, from accepting credit cards and tracking sales and inventory to small-business financing. Customers also use Square Cash, the easiest way to send and receive money, and Square Order, a new way to pre-order food and drinks for pickup.

Motif Investing #14

“For those interested in active trading, Motif Investing offers a unique spin on the robo advisor space.” - Forbes

Company Description

Motif Investing is a concept-driven trading platform that allows you to act on your investing desires—whether it’s a hot trend like “robotics revolution,” a trading strategy like “buy the dip,” or an investment style like “Ivy League endowment.” They make it easy to act on these concepts by turning them into motifs—intelligently weighted baskets of up to 30 stocks or ETFs. Based in Silicon Valley they are changing the face of online investing. Their social platform is transparent and allows individuals and investment advisors to invest in stock and bond portfolios built around everyday ideas and broad economic trends, as well as creating brand-new motifs from scratch.

Lending Club #24

“We’re a threat to the model, but we are not necessarily a threat to the bank, when we talk about transforming the banking industry, it’s a positive transformation for the consumer. But it could be a positive transformation for the bank.” - Renaud Laplanche, CEO

Company Description

Lending Club is the world’s largest online credit marketplace, facilitating personal loans, business loans, and financing for elective medical procedures and K-12 education and tutoring. Borrowers access lower interest rate loans through a fast and easy online or mobile interface. Investors provide the capital to enable many of the loans in exchange for earning interest. They operate fully online with no branch infrastructure, and use technology to lower cost and deliver an improved customer experience. Cost savings are passed onto borrowers in the form of lower rates and investors in the form of attractive returns. Lending Club is transforming the banking system into a frictionless, transparent and highly efficient online marketplace, helping people achieve their financial goals every day.

Prosper #25

"We believe Prosper is bringing much-needed innovation to financial services, and we applaud their efforts to build a product for consumers built on trust, transparency and excellent customer service." - Vic Pascucci III, the Head of Corporate Development at USAA

Company Description

Prosper is America's first peer-to-peer lending marketplace, with more than 2 million members and over \$5 billion in funded loans, connecting people who want to borrow money with those who want to invest. Prosper allows people to invest in each other in a way that is financially and socially rewarding. On Prosper, borrowers list loan requests between \$2,000 and \$35,000 and individual lenders invest as little as \$25 in each loan listing they select. Prosper handles the servicing of the loan on behalf of the matched borrowers and investors.

Coinbase #26

coinbase

"We continue to look at Coinbase as an infrastructure, providing programmatic access to buying and selling." - Adam White, Product Manager

Company Description

Coinbase is a bitcoin wallet and platform where merchants and consumers can transact with the new digital currency. They are making it easy for the average person and business to start buying and selling Bitcoin instantly by connecting their bank account. In addition, Coinbase provides a series of merchant tools that support some of the most highly trafficked sites on the internet. Coinbase processes the first \$1,000,000 of merchant orders for free, with a simple 1% fee after that. Combined with no chargebacks by nature in Bitcoin, this provides significant savings to merchants who are paying 3% plus to credit card fees.

iZettle #27

iZettle®

*“Since starting the company in 2011, we’ve tried to find the secret equation for growth.”
- Jacob de Geer, Co-founder*

Company Description

iZettle is a mobile payment solution that lets anyone accept credit cards with their smartphone or tablet. With iZettle, anyone selling anything face to face can use smartphones and tablets to accept credit card payments and manage their business – and for a fraction of the cost of traditional systems. iZettle works to help merchants start, run and improve their business using nothing but a free app with business analytics and insights, and a mobile card reader, that transforms smartphones and tablets into cash registers. The company offers everything from credit card readers to complete point of sale solutions and free sales overview tools.

Affirm #30

"We believe lending to bootcamp students is the single best way to help them invest in themselves, improve their quality of life, and become successful contributors to the new economy."

- Max Levchin, Founder & CEO

Company Description

Affirm uses modern technology to re-imagine and re-build core components of financial infrastructure from the ground up. Their focus is to improve the lives of everyday consumers with less expensive, more transparent financial products. They offer installment loans to consumers at the point of sale, enabling people to take out simple loans and turn any purchase into a few monthly payments. All the pricing through Affirm is adaptive based on data that prices marginal risk in real time and generates a risk score for every transaction, so every aspect of taking out the loan is completely transparent.

CircleUp #31

“These investors can now access an asset class they’ve never reached, without needing to pick and choose the companies themselves.” - Rory Eakin, Co-founder & COO

Company Description

CircleUp is an online private company investment platform. They provide accredited investors free access to direct investments in high-growth consumer product and retail private companies that were previously difficult to identify and access. For retail and consumer product entrepreneurs, CircleUp offers an efficient way to access a network of sophisticated investors as well as value added partners. Typical investments on CircleUp are food, personal care, pet product, apparel or retail/restaurant companies with \$1-\$10 million in revenue who are looking to raise up \$2 million in growth equity. CircleUp offers an efficient way to access a network of sophisticated investors as well as value added partners.

“IEX believes data and technology should be provided at a reasonable cost or no cost at all, we firmly believe that IEX can be an agent of change to address these issues, and many more, in pursuit of creating more efficient capital markets.” - Brad Katsuyama, Co-Founder & CEO

Company Description

IEX is a fair, simple and transparent market centre dedicated to investor protection, providing a more balanced marketplace via simplified market structure design and cutting-edge technology. IEX’s core innovation is its network architecture, which mandates that all orders travel a combined 43 miles of fiber optic cable before reaching IEX’s system. This distance neutralizes unfair advantages employed by some predatory trading strategies. IEX’s technology stands in contrast to conventional business practice, whereby incumbent exchanges sell or lease the space closest to their core matching technology to satiate the high-speed trading community’s need for speed. IEX also emphasizes simplicity to better serve traditional investors, by only supporting a focused set of 5 order types which serve investors’ core trading needs.

SoFi #36

"We think transparency is the main objective. For prospective students going in, schools show them how much it's going to cost, but I think they do a less good job as an industry showing how much they're likely to earn." - Dan Macklin, Co-founder

Company Description

SoFi is reinventing consumer finance for the better. They are a leader in marketplace lending, with over \$5 billion in loans issued to date. SoFi helps early stage professionals accelerate their success with student loan refinancing, mortgages, mortgage refinancing, and personal loans. Their non-traditional underwriting approach takes into account merit and employment history among other factors, therefore offering products that can't be found elsewhere. They offer individual and institutional investors the ability to create positive social impact on the communities they care about while earning compelling rates of return.

SocietyOne #37

SocietyOne

“As the pioneers of P2P lending in Australia, we believe the opportunity for marketplace lending is enormous. We have built a platform with the right technology, people, and strategic partners to support rapid growth.” - Matt Symons, Co-Founder & CEO

Company Description

SocietyOne is Australia’s leading Peer-to-Peer lending platform where investors connect with borrowers to get a better deal. They pioneered marketplace lending in Australia by connecting creditworthy borrowers directly with investors. SocietyOne removes the cost and complexity of the traditional lending process, bringing borrowers and investors a better experience and a better deal. Their mission is to offer highly competitive personal loan interest rates and commensurate returns for investors in this asset class. The SocietyOne technology platform reduces the cost of originating and managing consumer loans, enabling SocietyOne to share its operating cost advantage with both borrowers and investors to therefore get a better deal.

OnDeck #38

“New York startup On Deck Capital hopes to appeal to these millions of businesses with a loan application process that takes minutes to complete and can be approved within a day.”
- Business Insider

Company Description

OnDeck uses technology to make the borrowing process simple, fast and efficient for small businesses in the US, Canada and Australia. Launched in 2007, OnDeck connects Main Street businesses – such as restaurants, retailers and other service providers – directly to capital. The proprietary OnDeck technology platform uses data aggregation and electronic payment technology to analyze the financial health of small businesses, allowing them to access the capital they need to grow. To date, OnDeck has delivered over \$3 billion in capital to small businesses nationwide.

FangDD #40

"We are aiming to create an effective and trustable real estate service platform for brokerage companies, buyers, sellers (developers and second-hand apartment owners)." - FangDD

Company Description

FangDD offers an online platform through which home buyers and home sellers can directly connect to each other, working on a "pay-for-performance" business model. The goal is to provide accurate information about properties, services and transactions to create an open, cooperative, coexistent and mutually beneficial industrial pattern. In the first 6 months of 2015, more than US\$8b worth of real estate transactions took place using this platform. The company's O2O internet real estate marketing platform is based on big data technology. It integrates online and offline property businesses and buyers on a single platform, allowing user friendly property transaction services. FangDD follows a business model of pay-for-performance, catering to customers across 50 cities in China, including Beijing, Shanghai and Shenzhen.

AngelList #50

“Helping entrepreneurs turned angels use their expertise to fund new, world-changing startups is what AngelList is all about.” - Naval Ravikant, Founder

Company Description

AngelList is a platform for startups to raise money online, recruit and apply to incubators. They connect startups to angel investors whom they would not otherwise be able to find, and facilitate angel investment through features such as the formation of syndicates. AngelList startups connect to angel investors by creating a profile for their business on AngelList which will then show in the feeds of angel investors. Angel investors are also able to form syndicates, whereby they pledge money to mirror the investment backing of prominent angel investors.

BIOCATCH
Less Friction. Less Fraud.

“BioCatch consistently works to stay ahead of the game in combating fraud.”
- Oren Kedem, VP of Products

Company Description

BioCatch is a leading provider of Behavioral Biometric, Authentication and Malware Detection solutions for mobile and web applications. Available as a cloud-based solution, BioCatch proactively collects and analyzes more than 500 cognitive parameters to generate a unique user profile. Organizations use the platform to continuously authenticate users during their online sessions, protecting against cyber threats and fraudulent activity, such as account takeover and RAT-in-the-Browser (RitB).

Cinnober Financial Technology

“But in the end it’s really about improving the functioning of financial markets and eliminating the repeated system failures that erode confidence.” - Veronica Augustsson, CEO

Company Description

Cinnober Financial Technology is a world-leading and independent supplier of trading and clearing technology. They serve market operators, clearinghouses, banks and brokers. Cinnober’s solutions are all based on the TRADExpress Platform. The portfolio of offerings includes price discovery and matching, real-time risk management, clearing and settlement, index calculation, data distribution and surveillance. Except for being adopted by leading market players, the system has also been chosen by the European Commission to develop a real-time risk margining and multi-asset client clearing system for banks.

“We founded Credithood to be at the frontier of small business financing.” - Jack Elaad, Co-founder

Company Description

Credithood solves the biggest SMB problem - raising funds for growth. Through our platform, SMB raise funds from its repeat customer base in return for a discount on goods/services purchased during the term of the loan. Amount lent and not used for goods or services during the term of the loan, is repaid in cash at the end of the term. There is no paper work, no credit score, no external creditworthiness evaluation of the SMB. The whole transaction is based on the reputation of the SMB as perceived by its customer. They leverage the vote of confidence SMB received from its customers by collaborating with financial institutions like banks to top-up the amount raised from the customers by data-mining all the information gathered on SMB to create a new factor for its credit evaluation - “the Reputation Score” where the process is very easy and intuitive.

Friendsurance

“Friendsurance is a combination of friend and insurance. Originally the idea was to connect friends and family. But practice has shown that knowing each other in person is not crucial for our concept.” - Tim Kunde, Co-founder & Managing Director

Company Description

Friendsurance brings peer-to-peer finances to the insurance sector. It allows small groups of people to anonymously combine their premiums and if no claims are made, up to 40% of premiums will be returned to the clients. Insurance not only becomes cheaper for the consumer, but also provides a financial benefit for careful and fair behavior, which in turn reduces fraud and reduces the cost of claims for insurance companies.

GOCARDLESS

“My belief is that one of the fundamental things that differs between fintech companies and the banks is design.” - Hiroki Takeuchi, CEO

Company Description

GoCardless provides a simple and cost-effective way to accept recurring payments. GoCardless has automated and abstracted away the complexities of Direct Debit to expose an interface so simple anyone can use it, yet powerful enough to serve the UK’s largest institutions. They count multi-national businesses on our client list alongside individual personal trainers, and allow both to save time and focus on their business. Their technology also allows for them to keep fees low compared to other payment methods, just 1% per transaction, capped at £2. Their vision is to create a global Direct Debit network, making it easy for anyone to collect Direct Debit payments from anywhere in the world. This will allow businesses to collect money quickly and efficiently in countries around the world.

“goHenry helps solve one of the greatest problems facing parents and children today – how to enable children to spend safely in the increasingly cashless and digital world.”

- David Roche, Executive Chairman

Company Description

goHenry provides a Pre-paid Card and App with unique parental controls for young people aged 8 to 18. Each child gets their own goHenry debit card, and parents are able to set the rules and spending limits giving children the opportunity to gain independence in managing their money. Parents can easily set up automatic pocket money payments, set tasks to help their children earn extra money or make one-off money transfers straight to their child’s account, all in real time. It’s the smart solution for the younger generations to gain confidence with money.

“There are lots of exciting fintech start-ups out there at the moment but none have gone head on with core banking like we have, We’re going after the heartland of banking.”

- Alick Varma, Founder & CEO

Company Description

Osper is a mobile banking service that gives children as young as eight a safe way to learn to save by doing. The young person gets a debit card that their parent tops up weekly or monthly with their budget. The card can be used in shops, at cash machines and online. Both parent and child get an app that allows them to track spending on the card together. The experience helps young people to learn in the way that’s most natural - by doing. It changes the way that the kids and parents talk about money too. Osper wants to make family budgeting a shared experience - one that’s trusting and educational, and provides the life lessons that so many adults never had when they were young.

Property Partner

“Property Partner is transforming the way people invest in the residential property market. Our vision is to create a global stock exchange for residential property.” - Dan Gandesha, CEO

Company Description

Property Partner is a property crowdfunding platform which enables people to invest in residential property at the click of a button. Investors can buy shares in individual buy-to-let properties similar to the way they can invest in stocks. They can invest as little or as much as they like in an individual property. Once the property is fully crowdfunded, investors receive rental income in proportion to the number of shares they have. Property Partner finds the tenants and manages the property. Investors can exit their investment at any time through a secondary market on the Property Partner platform and/or after five years when the individual property is sold at market value. The vision for Property Partner is to create a global stock exchange for residential property.

“Record it. Prove it. Replay it. Predict it. Marketing and Compliance will love it.” - Qumram

Company Description

Qumram provides a solution for session recording and replay of user interactions for web, social media and mobile channels to ensure regulatory compliance, detect online fraud and improve customer experience. Qumram seamlessly records all online information, transactions and engagements across all the digital channels; web, social media and mobile. It creates a single source of truth for all your online information and activities at any given point in time for legal and compliance benefits. It allows easy discovery of relevant recorded data, playback of user sessions and reproduces authentic information for better customer service and behavior insights. Customers gain insight across all digital activities. They analyze their customers experience and discover opportunities to boost banks and insurances conversion and increase their sales.

“The technology’s ready, It’s ready for adoption. Now it’s just a matter of scaling it up.”
 - Chris Larsen, CEO & Co-Founder

Company Description

Ripple provides global financial settlement solutions to enable the world to exchange value like it already exchanges information – giving rise to an Internet of Value (IoV). Ripple solutions lower the total cost of settlement by enabling banks to transact directly, instantly and with certainty of settlement. Banks around the world are partnering with Ripple to improve their cross-border payment offerings, and to join the growing, global network of financial institutions and market makers laying the foundation for the Internet of Value.

SALARY FINANCE

“SalaryFinance is a ‘no-brainer’ solution for businesses that are keen to help their employees improve their financial health.” - Dan Cobley, Former head of Google UK and chairman of SalaryFinance

Company Description

SalaryFinance is a new employee benefit whose mission is to save UK workers £4bn per annum through lower interest repayments. SalaryFinance works with progressive employers to help their staff reduce their personal finance interest costs. Their platform allows employees to take out loans when they need it, with repayments collected from salary deductions. This repayment method substantially lowers risk/cost, the savings from which we pass on to employees. They focus on reducing the cost of existing borrowing, rather than encouraging more. On average, employees who use SalaryFinance, benefit from an equivalent 2-3% pay rise, through lower interest costs. There is minimal admin and no cost or liability for employers, making SalaryFinance a win-win product, for employers and their staff.

*“It’s a digital business model that will make the heads of wealth at the big banks shudder.”
- Australian Financial Review*

Company Description

Stockspot helps clients invest in a professionally managed portfolio of global investments for a fraction of the fees charged by traditional financial advisers and fund managers. Clients answer a few questions about their financial situation and goals, the online engine then recommends an investment strategy based on their personal profile. Stockspot portfolios invest in low-fee Exchange Traded Funds across a range of asset classes that are constantly reviewed to ensure that clients have access to the best possible return and diversification opportunities. They monitor and optimise portfolios when markets move, and take care of financial reporting.

Syndicate Room

“Equity crowdfunding can be beautiful, but it has to be sustainable. It has to work for investors.”
- Gonçalo de Vasconcelos, Co-Founder & CEO

Company Description

SyndicateRoom is the only UK-based investor-led equity crowdfunding platform. SyndicateRoom allows its members to co-invest alongside experienced angel investors in highly sophisticated investment opportunities on the same economic terms as the lead investors (i.e. they are offered the same share class and price per share). SyndicateRoom was founded by Gonçalo de Vasconcelos and Tom Britton, and its own lead investors and advisers are UK Business Angel of the Year Peter Cowley and super-angel Jonathan Milner. SyndicateRoom is authorised and regulated by the Financial Conduct Authority.

“We are committed to providing our clients with greater efficiency, effectiveness and agility by streamlining their AML/KYC process” - Jon Jones, President of Trulioo

Company Description

Trulioo was founded in 2011 with a mission to solve global problems associated with verifying identities online. By building a framework of trust online and implementing comprehensive privacy practices that fuses both traditional and alternative identity data, we are a step closer to achieving full financial inclusion. Trulioo’s bank-grade identity verification product, GlobalGateway, enables businesses to perform frictionless identity verification for more than 3 billion people in over 40 countries via 145 data sources - the widest coverage in the market. GlobalGateway helps businesses comply with Anti-Money Laundering (AML) and Know Your Customer (KYC) identity verification needs, and provides a reliable and trustworthy way for businesses to evaluate new and existing users through one, single portal or API. Trulioo powers fraud and compliance systems for hundreds of clients worldwide in an effort to increase trust and safety online.

“Valuto.com offers a total package solution for SMEs that until now has only been available to the big global bank’s corporate clients.” - Michał Czekalski - MoneyConf Belfast 2016

Company Description

Embracing cross-border banking, Valuto offers a multicurrency wallet for SMEs and sole traders, a centralized location to facilitate everything from foreign exchange to sending and receiving cross-border payments. The solution accesses the company’s network of bank accounts across Europe, enabling valuto.com customers to send and receive same day transfers at a fraction of the cost. The platform also leverages the company’s existing currency-exchange marketplace, which boasts over 360,000 registered users and facilitated over 2.5 billion Euro in exchanges in 2014. Additionally Valuto boasts an open API which enable seamless integration with numerous systems including SaaS accounting services, e-invoicing, B2B marketplaces and e-commerce platforms.

YoYo Wallet

“We are not just trying to solve a payment problem, what makes this work is the opportunity for retailers to increase loyalty and engagement with customers in a way that is not possible with payments made in cash or on a credit card.” - Alain Falys, Co-founder & CEO

Company Description

YoYo Wallet is more than just payment. YoYo makes payments easier, faster and more rewarding. When you pay with YoYo, you'll automatically collect points and stamps without the hassle of having to think about it. Instantly receive vouchers for rewards and in-app purchases and get digital receipts sent straight to your phone, no fuss. Looking for your next caffeine fix? Buy 12 coffees up front for the price of 10 (you were going to buy that next one anyway!).
